Re: EPA Approval of Pre-Final Remedial Investigation Report for Harbor Oil, dated March 23, 2012

Dear Ms. Allen:

The United States Environmental Protection Agency (EPA) has completed the review of the Pre-Final Remedial Investigation Report for the Harbor Oil Superfund Site dated March 23, 2012. EPA approves the document as Final. Please proceed with publication of the document by providing three hard copies of the text and figures, including the risk assessments. The remaining appendices may be provided on compact disc. EPA requests 6 complete electronic copies on compact disc. EPA appreciates the Voluntary Groups cooperation during this phase of the project. EPA intends to propose No Action for the Site based on the conclusions of the risk assessment which identify no unacceptable risk under the Comprehensive Environmental Response, Compensation, and Liability Act to human health and the environment from releases at the Site. If you have any questions, please contact me at (206) 553-1478.

Sincerely,

A handwritten signature in blue ink, which appears to read "Chris Cora", is written over the typed name.

Christopher Cora  
Project Manager
